

Is Health Plan Self-Funding Right For Your Client?

Q. What is Self-Funding?

If your client is a business with more than 50 employees then funding their own risk pool to create a custom health plan may be a cost-saving option that you'll want to consider. Third Party Administrators like P5 are best suited to control health care costs, maximize benefits and engage members. P5 can also offer clients flexible benefit plan solutions to address unique client needs.

Q. What Kind of Benefits Could My Clients Achieve with Self-Funding?

Ask yourself these questions....

- Is your client searching for ways to reduce health care costs while improving the quality of care for their employees?
- Are you looking for ways to help your clients streamline tracking, reporting and health care administration - without having to implement a totally new IT system?
- Is health plan administration and medical management a burdensome resource drain on your client's bottom line?
- Are you looking for flexible medical solutions that will allow you to tailor health plan components to meet specific client needs?

If you said yes to any of these, then self-funding can help your clients successfully achieve any or all of them.

Q. What Should I Look For in a Self-Funding Partner?

Turn to a third party administrator that offers:

- In-depth expertise in all facets of health plan administration.
- Proven experience delivering results for a wide array of corporate clients.
- Proprietary, in-house technology solutions that can interface with the wide range of associated vendor systems.
- Resources to both educate and smoothly implement a self-funded solution.
