

# An online solution for effortless enrollment

**P5** is happy to introduce our clients to a new online benefit tool equipped to enroll members in their benefit plan and manage their information. This online solution has been designed to provide you with the resources you need to manage enrollment processing, generate benefit reports and track enrollment history over time. The eligibility information entered into this tool is seamlessly integrated into P5's claim payment system, eliminating electronic eligibility feeds and paper processing.

Designed to handle the complexity of benefits management, this intuitive tool offers the online solution you need to reduce the HR Manager's "paper-chase" nightmare. This online solution can be configured to manage premium reconciliation, manage health benefit information, configure enrollment reports and automatically alert administrators of ineligible over age dependents. The unique part is that you can configure it to manage all of your benefit administration needs or just a portion; you choose.

From benefit planning to eligibility enrollment, this rules-based tool ensures an error-free enrollment process. The multitude of resources offered in our online benefits administration tool provide a one-stop reference guide for side-by-side plan comparisons, accurate plan costs by benefit class, drill-down information, news, library, documents, forms, FAQs, plan calculations, and a glossary of terms.

A solid benefits administration plan makes you the employer of choice in your employee's eyes. This is why our new online enrollment management tool complements any benefit administration plan by keeping HR Managers and Benefit Administrators in the know. Our online enrollment and benefit management tool is your one-stop solution to HR management.

Please feel free to contact your Client Manager for more details on how your company can benefit from our new online enrollment services.
